THE ATTACK ON RIO.

Engagement Between the Rebel War
ships and the Forts.

BUREAU OF NEWS, September 15.—

Dispatches received here from Rio give some idea of the bombardment which has taken place in the bay. The facts as they reach here are as follows: The rebel ships Aquidaban, Republica and Trajano made an attempt to land soldiers and marines at Camboia, in the bay of Rio. The insurgents' ships are reported to have used only small rapid-fire guns in firing on Camboia, and their fire is supposed to have been intended more for the purpose of covering the landing insurgent forces than as a regular bombardment. The rebels, it is added, have taken prisoner the officers of the gunboat Allouez.

The guns on the Aquidaban thundered forth at long range, for the rebel ships are not foolish enough to engage the forts, and the latter replied to the fire of the war vessels without apparent damage. At night there was a period of calm, but hostilities are expected to be resumed unless some understanding can be arrived at between the rebels and the Government. The people believe the rebel ships would be only too glad to put to sea, but the contracted entrance to Rio bay, with Sugar Loaf fort on the left and Fort Santa Cruz on the right, is a dangerous place for them to try and pass.

The insurgents fired a few shots at the forts, but did not engage them in the true sense. The sound of firing reaching the city caused alarm among the people. The loss of life, so far as known, is only one. A woman residing near the arsenal was killed by a falling brick. Both sides seemed to know little about handling modern ships' artillery. At the rate things are going, the war ships will have to surrender for the lack of ammunition and provisions. Fort Lage was also subjected to a few shells by the rebels, but Fort Santa Cruz was the principal object of most of the rebel attack. Fort Elezua Villa did most of the replying to the bombardment and the attempted landing at Camboia, but there is no record of the war ships having suffered any damages from shot or shell. Rio itself was not bombarded. A few shells fell in the city as the result of bad marks-manship, but no great damage was done.

No doubt many people on shore are in sympathy with the insurgents, for the latter seem able to keep posted concerning all the doings ashore. A few nights ago an attempt was made by a small steamer, with some government army and navy officers on board to creep up to the ironclads at night. They had a torpedo boom rigged out ahead and were steering quietly up to the apparently sleeping ironclads in the darkness, when searchlights were turned on, and a second or so later a hail of machine gun bullets was flying. Happily for the torpedoists the aim of the rebel sailors was very bad, and the tug seems to have gotten away with all safe on board.

WASHINGTON, Sept. 15.—Additional advices from Rio point in a positive manner to the overthrow of the present Government. Dissatisfaction is not confined to the navy alone, but is spreading to the army, where opposition to the Government is becoming pronounced. It is believed dispatches will soon be received here announcing the success of the insurgents.

THE NEW ELECTRICAL COMPANY.

A Man From New York Will Do the House Wiring.

The electrical work of E. O. Hall & Son has received considerable impetus with the arrival of Mr. George Canney, who has been secured to take charge of interior wiring and fixture work for the above firm.

Mr. Canney comes from New York city, where he has been long engaged in the highest grades of electrical work in residences, fire-proof buildings and ocean steamships.

In New York Mr. Canney was associated in the electric lighting with Mr. Warriner, superintendent of the Hawaiian Electric Company. The people of Honolulu are fortunate in being able to avail themselves of the services of a man who is so thoroughly acquainted with this complicated and important work.

Now is the time for persons desiring electric lights to have their houses wired in readiness for the current which the Hawaiian Electric Co. will soon be able to furnish from the thoroughly equipped station now being erected on Hale Kaula street.

No doubt that any orders for wiring will be gladly received by Mr. Canney and be promptly attended to.

NEWS IN A NUTSHELL.

John Abia, a peripatetic Hawaiian, is now working for Hamilton Johnson at La Jolla, Cal.

The meeting of Sam Parker's creditors adjourned until to-morrow at 3 p.m. for want of a quorum.

A 400-pound shark was caught in the nets of Chinese fishermen outside the lighthouse last night.

The trial of J. P. Brown for larceny has occupied the attention of the Police Court to-day, and is still going on.

The new vault for the Hawaiian Safe Deposit and Investment Company arrived this morning on the barkentine Planter. Ned Jones and Tom Hobron are there for happy.

PERSONAL.

F. D. Walker, formerly connected with the police department here, returned on the Oceanic.

S. Watanabe, a Japanese with a European wife, who is attached to the Japanese legation at London, is on his way to that place.

Among the through passengers on the Oceanic this trip is O. Von der Hyde, who is connected with a large mercantile firm at Hongkong.

ITEMS OF INTEREST.

Owing to a severe headache a New Yorker committed suicide the other day.

A Moldavian lady is at her own expense constructing a railway from one of her estates to the nearest town.

In Great Britain the annual sick rate for each inhabitant is ten days to the year; in the United States eight days.

Tables show that per 1,000,000 Protestants in Bavaria there are 640 insane, per 1,000,000 Catholics 849, and per 1,000,000 Hebrews 1199.

Descartes says he was followed by an invisible person whose voice he heard urging him to continue his research after truth.

The kind of wood most in favor for antique and medieval carvings were oak, cedar, cypress, sycamore, pine, box, fig and ebony.

Greek paintings were executed in distemper with glue, milk or white of eggs, and on wood, clay, plaster, stone, parchment and canvas.

The oil deposits of Pennsylvania were discovered in 1845 by two men boring for salt. They struck an oil spring which gave forty gallons a day.

A new lull-talking telephone has been invented in England. The receiving instrument is said to speak loud enough to be heard all over the room.

Knotty fingers with square phalanges are peculiar to theorists on practical matters, such as affairs of government and administration. Pascal and Descartes had such fingers.
